Subject: Re: Dimock Draft Sampling Plan

Any chance of sending a Word file version so I might add edits and comments, should they be necessary?

Subject: Dimock Draft Sampling Plan

Rich,

Attached is the draft Sampling Plan for the Dimock Residential Groundwater Site. Please note that Table 1 and Table 2 of the SAP, does not account for surface water samples as we are unsure on the analysis and minimum detection limits you would want performed on them. I would assume it would be different from the residential tap water samples. Once the list of parameters and the minimum detection limits have been determined for the surface water samples, we can go ahead and update the table. Also, on Table 2 there is some yellow highlight which is to indicate that information is not finalized. It is most likely correct, but we were still trying to verify it. I didn't want to hold up your initial review of the plan, however, so I thought it would be best to send it to you as is.

Please review and let us know if you have any comments or questions pertaining to the SAP.

Thanks,

Suddha Graves
